Benefits*

Transportation Group

Ohio Logistics Transportation offers a wide variety of services designed to drive efficiency and profitability back into your business. We will do more than help you get shipments from point A to point B. We will help streamline your supply chain through mode and route optimization, carrier management, freight consolidation, reverse logistics, and freight payment and audit. This allows you to focus on core competencies and receive a logistical advantage over the competition through the use of our professional third party logistics services.

SERVICES PROVIDED

- Long Haul
- Short Haul
- Yard Management

- Cross Docking capabilities

Transportation Services

Box Trucks

Flatbeds

Hostlers/Spotters

Trackmobile

- *Ohio Logistics has the equipment, staff, and expertise to get your job done safely, on time, and cost effectively.*

Foreign Trade Zone Benefits

THE FOREIGN TRADE ZONE (FTZ) PROGRAM was created by the U.S. government to facilitate international trade and increase the global competitiveness of U.S. based companies. The program, which has existed since the 1930's, continues to thrive and change to better meet the needs of American companies in the global economy.

WHAT IS AN FTZ? An FTZ is an area within the United States, in or near a U.S. Customs port of entry, where foreign and domestic merchandise is considered to be outside the country, or at least, outside of U.S. Customs territory. Certain types of merchandise can be imported into a Zone without going through formal Customs entry procedures or paying import duties. Customs duties and excise taxes are due only at the time of transfer from the FTZ for U.S. consumption. If the merchandise never enters the U.S. commerce, then no duties or taxes are paid on those items.

ACTIVITIES PERMITTED IN A FOREIGN TRADE ZONE

Merchandise entering a Zone may be:

Assembled, Tested, Sampled, Relabeled, Manufactured*, Stored, Salvaged, Processed, Repackaged, Destroyed, Mixed, and Manipulated.

**The user must receive special approval from the FTZ Board for manufacturing.*

OPERATING WITHIN AN FTZ CARRIES NUMEROUS BENEFITS:

- Deferral, reduction and possible elimination of duties.
- Tighter inventory control that may virtually eliminate year-end inventory loss adjustments.
- Potential direct delivery benefit reduces long hold times at crowded ports of entry.

Technology Solutions

Having a powerful WMS is no longer enough. Ohio Logistics recognized that world class service means world class visibility. Visibility of inventory, visibility of order status and visibility of KPI's, for us and for our customers, automatically!

Built on a leading-edge technology stack, the next generation WMS delivers a cloud-based suite for fast, accurate and complete visibility throughout the supply chain, providing the vehicle to allow EDI exchanges to happen automatically. This enables customers to view orders and inventory via secure web portals, or dashboards tailored to each individual user, and manages exceptions within our operations. Automated email or fax alerts ensure activities happen as planned and needed information is available when and where it is needed, for us and our customers.

- *Automated Event Management*
- *Business Rules-driven*
- *Value Added Services*
- *Flexible and Scalable*
- *Built-in Lot Control*
- *Activity Based Costing*
- *Scannable Labels & Documents*
- *RF*
- *EDI*
- *Customized Dashboard Views*
- *Multi-lingual*
- *Task Based Process Management*
- *Inventory Management*
- *Real Time KPI Reporting*

Strategic Partners Serving You

www.BenchmarkEng.com

www.BenchmarkNational.com

www.Benchmark-USA.com

The Benchmark companies were founded in 1980 to support customers' quality needs. Benchmark's years of experience provide a solid knowledge base to develop effective, real-world solutions that generate results for customers throughout North America.

Benchmark National (BNC) provides sorting, inspection, rework, containment services, and light manufacturing processes across many different OEM industries with particular emphasis on the Automotive and Appliance Industries.

- *All work is performed by BNC employees who are trained in Safety, Reporting, Data Collection, Work Instructions, Processes/Procedures*
- *Through our partnership with Ohio Logistics, we can offer warehousing solutions for inspection projects in almost any geographic area.*
- *24/7 coverage with 2 hour response time to sites within 50 miles of a BNC location*
- *Project Lead / Supervisor on site for all jobs*
- *ISO 9001 Registered for Containment, Sorting, & Rework*

Benchmark Technologies (BTC) provides quality system auditing and consulting, training, recruiting, and staffing.

Benchmark Engineering (BEGI) provides consulting and project management services for construction, relocation, expansion, and environmental management.

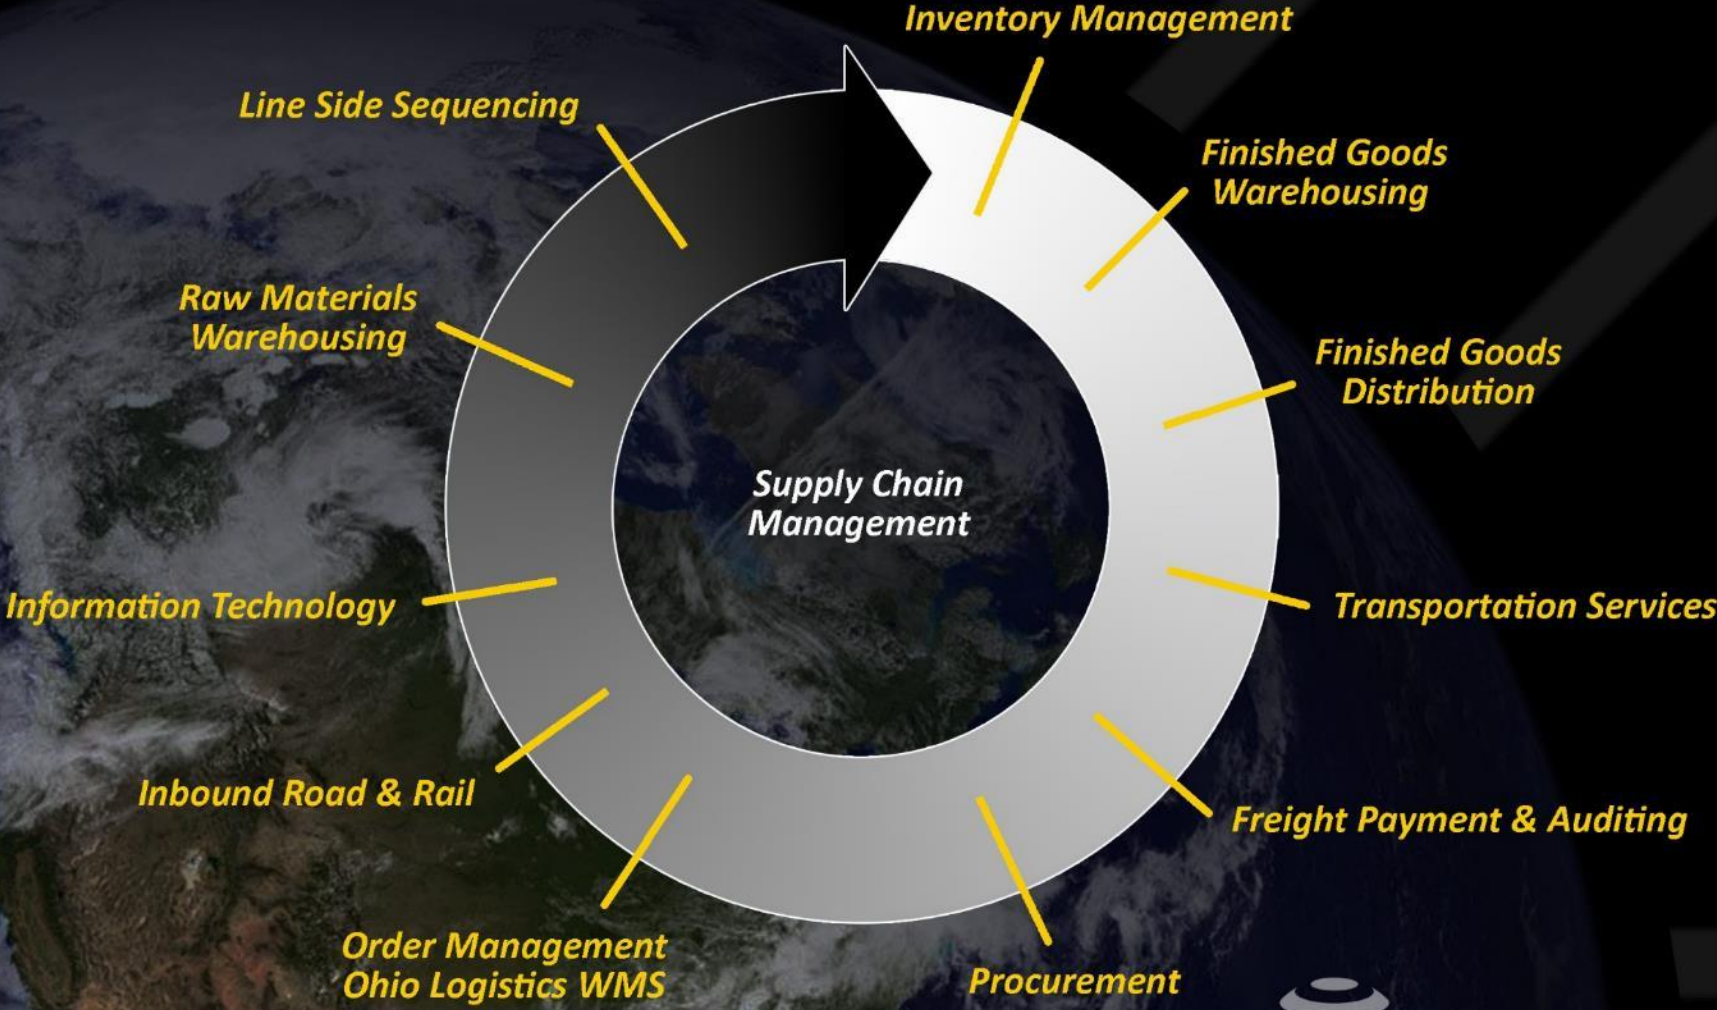

True Single Source Integrated Supply Chain Offerings

- *Shared raw materials and parts warehousing fulfillment centers*
- *Finished goods warehousing and distribution*
- *Vendor Managed Inventory (VIM) support and coordination*
- *WMS and ERP, SAP type integrations to provide complete visibility throughout the supply chain functions*
- *True line side sequencing & production capabilities*
- *Transportation support, short haul, regional, freight management & payment*
- *Kitting, light manufacturing, light assembly*
- *Business to Business, Business to Consumer fulfillment*

Ohio Logistics Single Source Integrated Supply Chain Management Example

Single Source Integrated Systems Model Example

Supplier Managed Inventory, Warehousing - Process and Data Flow

- Assumes a paperless environment
- Selective information is available to vendors via a web interface. Dashboards, web interface and reports (user or auto generated) are available to customer users based on security credentials.
- All data is contained within the ERP system. Dashboards display real-time mirrored data. No external access is provided to the MsSQL Database.

Improve Efficiencies

Ohio Logistics extends the possibility to improve efficiencies through electronic data exchange into the Ohio Logistics WMS.

Ohio Logistics Data Flow Example

Inbound & Outbound

- *Systematic ASN transactions for receipts and shipments*
- *Product arrives barcode labeled at Ohio Logistics*
- *EDI or Data Transfers, and confirmation, for all transactions*
- *Truck loaded to line side sequencing specifications if required*
- *Outbound product shipments order data seamless*

Production Support Model Example

Fulfillment Services Meets Production Needs

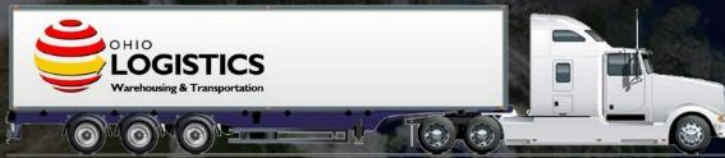

- *Reduce dock congestion with Sequenced Production* (trailer makes one trip to dock)
- *True Line Side Sequencing supports the Production Plant*

0500 hours

1,100 hours

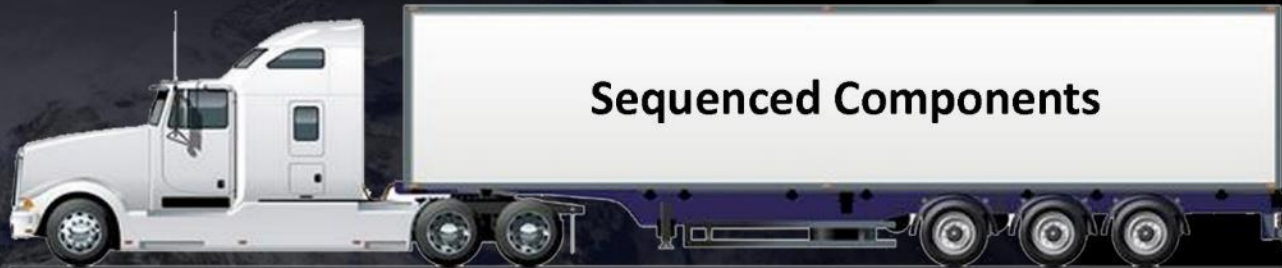

1,700 hours

2,300 hours

“Shared” Assets

Reduce rolling stock trailer numbers and costs, while increasing utilization with shared assets

Reload, and return shipment to warehouse

Labor Cost Comparisons

3PL vs. Manufacturing

3PL

- *Loaded labor costs range approximately from \$24 to \$26 per hour*
- *Shipping and Receiving administrative costs range approximately from \$22 to \$24 per hour*

Manufacturing

- *Loaded labor costs range approximately from \$28 to \$40 per hour*

Improve Plant Efficiencies

3PL vs. Manufacturing

3PL

- *Product Storage Space costs range from \$4 to \$6 per square foot annually*

Manufacturing

- *Manufacturing Space costs range from \$45 to \$100 per square foot annually*

3PL increases production space, and offers better utilization of dock, staging & warehouse space

Integrated Supply Chain Solution

Benefits Review

- *Removes the distractions of non-core activities, freeing resources to concentrate on the core business activities of manufacturing world class products.*
- *Reduction in auditing, processing, payment of warehouse/transportation provider invoicing.*
- *One point of receipt for bulk and vendor products.*
- *Reduce inventory costs through tighter controls down to the optimal inventory levels.*
- *Reduced damage from “overhandling.”*
- *Reduced labor costs through outsourcing.*
- *Reduction in congested receiving, staging, and storage areas.*
- *Increased productivity of plant manufacturing space.*

Mission Statement

Our goal is to be recognized as a World Class Quality Distribution Facility as measured and rated by our customers' determination based upon actual experience with our service and our people, measured against their needs and expectations.

Our pursuit of this goal will be embodied in the philosophy of Consistent Search of Excellence in service and communication. Methods to be employed in attaining these goals include various statistical methods, associate training, and utilization of associate involvement groups to solve problems.

We are obligated to develop our associates, meet our customers' needs, and provide an equitable return to our shareholders and stakeholders. We will make every business decision as if the service provided was destined for our own or our family's use. Every FTTDC associate is expected to commit to this philosophy in the performance of his or her tasks.

We will continually improve all areas of our business through creative involvement of our greatest resource, OUR PEOPLE.

Ohio Logistics Creates Value

Ohio Logistics has the manpower, experience, and willingness to learn the processes and intricacies of your specific business needs.

Working together, we will collectively create value for you and the communities in which we operate.

Who loves logistics?

We Do!
