

## Kyle Larson Takes Checkered Flag At the 32nd Annual Ohio Logistics Brad Doty Classic

Racing headlines were in the works shortly after the checkered flag fell at Attica Raceway Park on July 14th for the 32nd Ohio Logistics Brad Doty Classic.

Kyle Larson held off 10-time World of Outlaws NOS Energy Drink Sprint Car Series champion Donny Schatz to win the Ohio Logistics Brad Doty Classic presented by Racing Optics – his first Classic win, first World of Outlaws win at Attica, and third World of Outlaws win in a row.

The father and son duo of Sheldon and Jac Haudenschild put on a show in the top-five, trading slide jobs and swapping positions all night long.

“It’s one that I think everyone looks forward to running,” Larson said about winning the Brad Doty Classic and claiming the \$10,000 top prize. “Brad (Doty) is such a nice guy and has done so much for this sport, long before

I was born. It’s cool to get the opportunity to run this race. I got beat by Donny the last time we ran here, so it was good to edge him there.” Larson was a dominate force all night. He won his Drydene Heat Race, drew the number one pill for the DIRTvision Fast Pass Dash and then won the Dash by four seconds to start on the pole for the 40-lap Feature.

“It was nice I could look back and see they were half of a track behind me,” Larson said. “We had a good car there. Whenever I would get within a straightaway of lap traffic, I couldn’t see the cushion and started to make mistakes and thought I could cheat the corner and slide myself. I saw Donny (Schatz) show his nose a couple of times. I had to get aggressive to get around those two slower cars. I was able to do that and get some good consistent laps put together.”

Congratulations, Kyle! We wish you continued success!

### Interesting Ohio History

*Script Ohio is an Ohio State University tradition that dates back to October 1936. It is recognized as one of the greatest and most unique traditions in college football. With the direction of the drum major, the entire OSU marching band steps in formation to the tune of Le Regiment de Sambre et Meuse spelling out “Ohio” in cursive. The most well-known portion of the Script Ohio performance is after the spelling of “Ohio” is complete, a Senior sousaphone player will emerge from his or her position and dot the “i”.*

## Standardization Equals Success

### A look at Ohio Logistics' Bowling Green warehouse operation

by Ohio Logistics' Kevin Anderson

*Ohio Logistics' Bowling Green warehouse. The 200,000 sq. ft. existing facility is in the background, with a 100,000 sq. ft. expansion underway in the foreground.*

Our Bowling Green warehouse has been in operation for over two years, opening in June of 2018. Currently, we are at maximum capacity in our existing facility. An additional 100,000 sq. ft. building, with expansion capability to 200,000 sq. ft., is under construction to handle the growing needs of our customers.

One customer produces product for Ford, GM, Toyota, Chrysler, and Nissan. This is a 3-shift operation that requires Ohio Logistics to supply product to and from their facility on all three shifts. Orders are placed every four hours for delivery to the product manufacturer. They run a JIT operation, so the product is then taken to their production lines and finished goods are produced. Those finished goods are then loaded onto one of Ohio Logistics' trailers and shuttled over to the warehouse to be unloaded, staged, and shipped out to their customers. This is primarily a picking operation for our facility. There is a total of six shuttles per day with around 400 boxes that need to be hand-picked for each shuttle. Each box is picked per FIFO order and must be scanned in our Abecas system for inventory control purposes. We currently ship roughly eight loads of finished goods per day for this customer. We also receive eight supplier loads per day. The shipping and receiving is done primarily on 1st shift, with picking operations done on 2nd and 3rd shift.

Another customer deals in the manufacture of absorbent products. Our warehouse receives trailer loads of finished goods from our customer, unloading and staging the trailers based on FIFO. Once the trailer is unloaded and put away, the empty trailer is then shuttled back to our customer to be filled again and returned. This is also a hand pick operation for us. Our associates must go out and hand pick and build mixed pallets along with full pallets for shipments to the manufacturer's customers. Some of these customers require the whole load to be hand-picked. These loads can take a picker their entire shift to complete.

We also have another customer that is similar to a pass-through operation. We receive ocean containers that are floor loaded with product. We must unload the container by hand and stack boxes of same product on skids. The container can be filled with many different part numbers. We sort the product, stack them on pallets, shrink wrap the skids, and label them. They are then put into storage awaiting an order to ship back to our customer, who places orders based off of their customers' demands.

Our existing 200,000 sq. ft. warehouse is currently completely full. This has created a need for additional warehouse space in Bowling Green. Our 2nd warehouse is being built at

this time right behind Building #1. This will be a 100,000 sq. ft. warehouse with expansion capability to 200,000 sq. ft. when needed. Ohio Logistics has partnered with another automotive manufacturing customer based out of Tennessee. They will be utilizing 50,000 sq. ft. of the new 100,000 sq. ft. facility for manufacturing needs. The additional 50,000 sq. ft. will be used for overflow warehousing needs.

Our growth in Bowling Green is due to the great customers that we have, and the great team we have built. Over time, we have established high expectations and goals that our associates define and achieve on a daily basis. The fact that we identify these goals and strive to achieve them is what drives our efficiencies and makes our BG operation successful. I am proud of the team that we have assembled, and the standardization that we have put in place to provide our customers with the best services available.

### Test Your Logistics IQ:

1) A computer term for a method of protecting the files and programs on one network from users on another network. A firewall blocks unwanted access to a protected network while giving the protected network access to networks outside of the firewall. A company will typically install a firewall to give users access to the Internet while protecting their internal information.

2) The inventory a company holds above normal needs as a buffer against delays in receipt of supply or changes in customer demand.

3) The ability to access or view pertinent data or information as it relates to logistics and the supply chain, regardless of the point in the chain where the data exists.

## 30 Year Anniversary! Dan Zehender

## Meet Kristen Price

Kristen is a one year associate and works in our Corporate HR department. Meticulous with the details, Kristen handles Payroll & Benefits, and kindly took time out of her day to answer our questions.

OL: Tell us about your family.

Kristen: My husband Jeff and I have been married for 16 years. We have two boys, Kale is 11 and will be a 6th grader, and Griffin is seven and is heading into 2nd grade. Both attend Arcadia School.

OL: What do you like most about working for Ohio Logistics?

Kristen: I enjoy the family atmosphere that Ohio Logistics has and the way they are involved with the community. Every morning I walk by a board filled with thank you cards sent to Ohio Logistics by people who have been positively affected by the company and it really is a great way to start each day.

OL: What are your favorite things to do with your free time?

Kristen: My family and I like to be outside. Most evenings we are outside by our pond if we aren't running to some type of practice or game.

OL: Describe your ideal vacation.

Kristen: My family and I really enjoyed going to the Silver Lake Sand Dunes a couple of years ago. We were able to take our boat to the back side of the dunes and enjoy the best of the sand and the water.

OL: What is your biggest pet peeve?

Kristen: People on their phones during a conversation.

OL: Of the 45 U.S. Presidents, which one would you most like to sit down with for a few drinks and why?

Kristen: George Washington. I would be interested in getting his take on being the first president and what it truly was like. I would also be interested in his perspective on the United States today.
